

Use `threshold=` !

- Allow for minor differences when comparing screenshots
- Example expectation from test app 114-modal-dialog
- Example expectation from test app 302-bootswatch-themes

```
app$expect_screenshot(threshold = 2)
```

```
app$expect_screenshot(  
  # Try to get the sliders to settle  
  delay = 1,  
  # 3% tolerance with 10k pixels over 3 channels  
  threshold = 900,  
  kernel_size = 100  
)
```

Lesson #3

Test values that you can control
